Symptom

How to generate SAML assertion for SAP SuccessFactors SFAPI/ODATA API using SAP provided offline tool?

Environment

SAP SuccessFactors ODATA API SAP SuccessFactors SFAPI

Resolution

Procedure to generate SAML assertion using offline tool:

Steps provided below has been provided for Windows Operating system. If you are using any other OS, please follow the guidelines provided Installing Apache Mayen

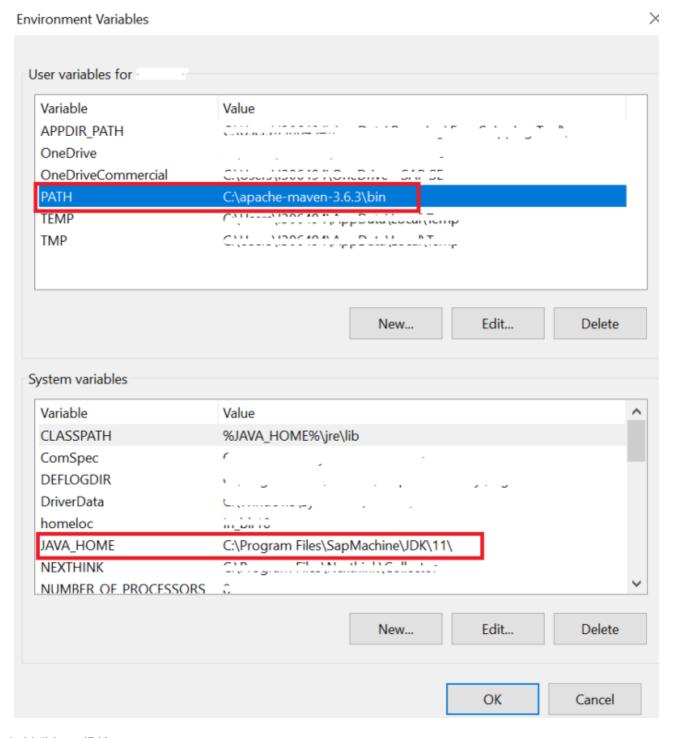

Step 1: Download file from <u>Installing Apache Maven</u> and unzip to your local drive.

Binary tar.gz archive	apache-maven-3.6.3-bin.tar.gz	apache-maven-3.6.3-bin.tar.gz.shab12	apache-maven-3.6.3-bin.tar.gz.asc
Binary zip archive	apache-maven-3.6.3-bin.zip	pache-maven-3.6.3-bin.zip.sha512	apache-maven-3.6.3-bin.zip.asc
Source tar.gz archive	apache-maven-3.6.3-src.tar.gz	apache-maven-3.6.3-src.tar.gz.sha512	apache-maven-3.6.3-src.tar.gz.asc

In my example, folder has been extracted in C drive

Step 2. Validating JAVA JDK compatibility and maintaining "system environment variables" in your machine

- 1. Ensure JAVA_HOME environment variable is set and points to your JDK installation.
- 2. Add the 'bin' folder to the variable 'PATH' as shown below

Step 2: Validate JDK

 Go to command prompt and execute below command to verify the JDK: echo %JAVA_HOME%

```
C:\>echo %JAVA_HOME%
C:\Program Files\SapMachine\JDK\11\
C:\>
```

Step 3: Validate if Maven was installed correctly

2022-04-07 3031657

1. Navigate to the directory on your local drive where you have extracted the folder and open the "bin" folder. Copy the path:

Example: C:\apache-maven-3.6.3\bin

2. Go to command prompt and navigate to the above directory:

```
Microsoft Windows [Version 10.0.18363.1440]
(c) 2019 Microsoft Corporation. All rights reserved.
C:\>cd C:\apache-maven-3.6.3\bin
C:\apache-maven-3.6.3\bin>
```

3. execute below:

mvn -v

```
C:\>cd C:\apache-maven-3.6.3\bin
C:\apache-maven-3.6.3\bin>mvn -v
Apache Maven 3.6.3 (cecedd343002696d0abb50b32b541b8a6ba2883f)
Maven home: C:\apache-maven-3.6.3\bin\..
Java version: 11.0.10, vendor: SAP SE, runtime: C:\Program Files\SapMachine\JDK\11
Default locale: en_US, platform encoding: Cp1252
OS name: "windows 10", version: "10.0", arch: "amd64", family: "windows"
```

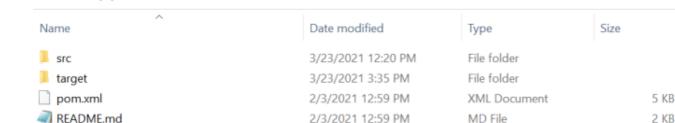

This means Maven installation is successful. Now we are good to proceed with generating SAML assertion using SAP provided offline tool.

Step 4: Generate SAML assertion using offline tool.

- 1. Go to attachment section of this KBA and download the zip file
- 2. Extract folder from ZIP file to your local drive.

OSDisk (C:) > SAMLAssertionGen-master

3. Now go to the folder " " and open "SAMLAssertion.properties" file

MD File

PROPERTIES File

4. Fill the data:

SAMLAssertion.properties

2 KB

3 KB

```
#Below properties should be changed before executing the project.
tokenUrl=<API_endpoint_URL>/oauth/token
clientId=xxxx
userName=XXXX
privateKey=xxxx
expireInDays=10000
```

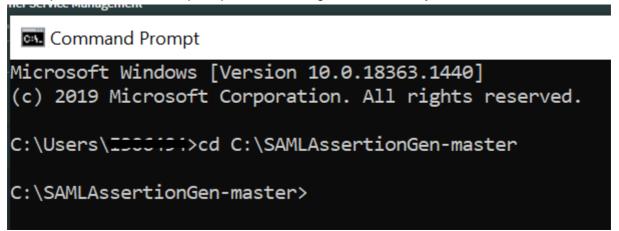

clientId: API Key which you received while registering the client in SF.

userName: API Username privateKey: X509 private key

Sample file:

- Save the file and close.
- 6. Now, open a new command prompt window and go to the directory where folder was extracted:

7. Execute below command:

mvn compile exec: java -Dexec.args="SAMLAssertion.properties"

8. Once completed, it would generate SAML assertion. Copy this and store it securely in your local drive
